

Target 100m – U6E

Target for small- and big bore ammunition.

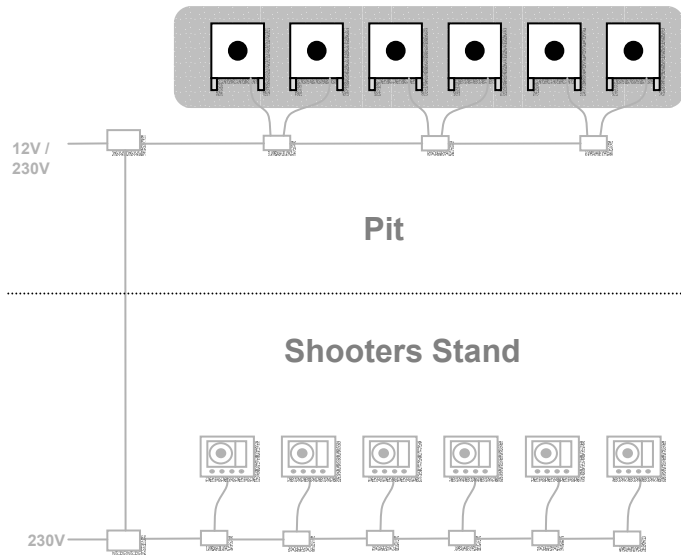

Automatic feeding of the rubber band. The feeding length is set from the monitor.

A warning is displayed on the monitor when the rubber band has reached the end or the feeding has stopped.

Target electronics is integrated in the target.

The target frame is made of solid wood, and the sensors (3 ea) and rubber band feeder are placed in the bottom of the target.

The lowest 20 cm of the acoustic measuring chamber can be protected by mounting part of the target behind a blender or below the edge of the pit. The sensors, the feeding mechanism and the target electronics is then protected.

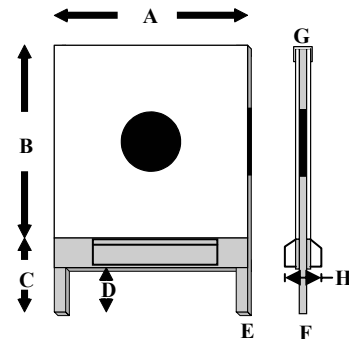

Recommended use :

- 100m
Small- and big bore, sport-shooters and hunters

Technical :

Dimensions:

A	1160 mm
B	1340 mm
C	500 mm
D	300 mm
E	70 mm
F	47 mm
G	120 mm
H	340 mm

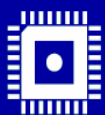

Temperature range -10 to +60°C

Vertical rubber band (roll) 2 x 350 x 8000mm

Weight..... Approx 40 kg
